

Subject: REACH Declaration for Madico's Window Film Products Designed for Interior Application and Use

Date: March 14, 2024

Madico Inc. is aware of the European Union (EU) legislation regarding the Registration, Evaluation, Authorization and Restriction (REACH) of Chemicals pursuant to the REACH Regulation (EC) 1907/2006, which entered into force on June 1, 2007. The following provides general information on Madico's compliance with REACH Regulation and fulfills its communication obligations. Madico has a comprehensive REACH compliance program, which is part of Madico's environmental compliance management system. Under Article 33 of the REACH Regulation, suppliers of articles have a responsibility to identify and communicate to the recipients of their products whether Substances of Very High Concern (SVHC) are contained in their products above the stipulated threshold.

At this time and to Madico's knowledge, none of the materials, or the aggregate thereof, within Madico's film products designed for interior applications and use contain any of the 240 substances per the REACH directive including the SVHC Annex XIV and Annex XVII in quantities that require notification by the European Chemicals Agency (ECHA).

As ECHA continues to update the Candidate list, Madico works with its suppliers to collect necessary information to meet the requirements of REACH, including the September 2015 European Court of Justice "Once an Article, Always an Article" decision, for products we sell in the EU. Madico supports the overall REACH objective of improving the protection of human health and the environment. Madico will continue to meet all applicable REACH requirements and is committed to providing our customers with information about the chemicals in our products as needed to comply. When appropriate, Madico will provide updated information regarding its compliance with the REACH Regulation and the use of SVHCs (if any) in any products supplied by Madico on www.Madico.com/productstewardship. If you have any questions regarding environmental compliance of Madico products, please do not hesitate to contact Madico.

Regards,

Timothy Herod, Ph.D.
