(United States and Canada Only)

Thank you for choosing Madico Sunscape® architectural window film!

To ensure proper curing of your window film, do not clean your windows for at least 30 days.

Safety films can take several months to fully cure. Do not attempt to pierce a water bubble during the curing period as this will cause damage to your film that is not covered by the warranty. Contact your dealer with any concerns. *Please see care instructions below.*

WINDOW FILM CARE

A scratch-resistant coating on the surface of the film helps protect it from damage, however, care should be taken to keep your film in good condition.

- Clean the film using any normal, household, glass-cleaning solution or plain, soapy water.
- Use soft, clean, lint-free towels or sponges to clean and dry the windows.
- Do not use any cleaning solution containing abrasive materials.
- Be careful when using any tools or sharp instruments on or around the windows that could cut, gouge, or scratch the film. Your Madico warranty does not cover mechanical damage.
